

Heritage Bank Welcomes You

BACK TO SCHOOL

At Heritage Bank, we recognize the importance of success for children and young adults. This is often achieved through support from the home, schools and the general community.

As part of the community, we are constantly engaging schools using our financial literacy workshops and online resources.

Ways You Can Help Your Child Become Financially Literate

As a parent, you are your child's first and most important teacher. With schools focused on core subjects, there isn't a lot of room for teaching financial education. Hence, the need to take charge and teach your children about money.

To help you prepare your child for a financially sound future, here are 5 effective tips to follow:

- Allow your children firsthand experience in saving and spending their own money.
- Create a financial mission statement for your family.
- Seize opportunities in your daily activities to model how you make spending decisions.
- Talk openly about money and basic finances.
- Get your children involved in budgeting and shopping for the home.
